CHEAPER PULLMAN RATES

Congress May Regulate the Price of Sleeper Berths.

SHERMAN'S BILL AGAIN

Determined Effort to Be Made to Place All the Companies Under the Interstate Commerce Act - How the Big Monopolies Declare Gilt-Edged Dividends-One Bed and One Law.

taining the belief that the present Congress will make an effort to peace all sleeping car companies in the United States under

Mr. Sherman will relateduce this bull into the present Congress. A similar bill will likewise be introduced in the House

of Representatives.
This, or rootse, will affect the Pullman Panace Car Company more than any other ar company. There are two siceping car companies in the United States at present, the Pullman and the Wagner companies.

ent, the Philman and the Wagner compandes.

The Philmans now operate in the United
States many thousands of cars, which
have yielded yearly for the past ten years
an enamous revenue, which has made the
Philman stack pernaps among the best
gittedgen divident paying stocks in the
Philman Company that not charge as much
for an upper berth as it did for a lower.
The standard price for a lower berth for
a single night was \$2. At aboat that
perford in the progress of transportation
desping cars came to be recognized as
an absolute necessity, and Mr. Philman
insovered that in many manners the upher berths were said in preference to
lower ones because of their leng cheaper
to price. Thereupon the lare for an upper
berth was made the same as that for a
lower.

PEOPLE DEMAND IT.

A general demand has arisen from the entire country which practically has reserved useff into a command upon Congress, to place the company under the provisions of the interstate commerce act. The sleeping car companies content, however, that they cannot be classified with radicals, has they do not operate roads, but merely contract with the radicoals for the use of their cars.

They claim to be upon the same equality as the express companies and so far, the express companies have been able to keep and of the contents of the interstate commerce provisions.

It is quite evident that if the pulse of public opinion may be taken for anything that the time is not far off when Mr. Pullman will be forced to reduce his rates. There is hardly a State legislature in the United States that has not at some time attempted hostile legislature to the corruption funds with the various Legislatures.

He has however been very speces ful and PEOPLE DEMAND IT.

corruption funds with the various Legis-latures. He has, however, been very successful, and in some cases, especially with the Indiana-and Illinots legislatures. Within the last ten years he has been able to prevent any antagonistic legislation. It is not to be betieved that he will be able ton revent legislation against his corporation by the uses of passes in the National Legislature. The general passenger agents, who are, in fact, the prime movers orgainst Mr. Pull-man, have advanced itself-legary that where berth a night be will be getting only about \$1.50 after Congress gets through with him.

This, of course, is for a lower botth, and for an upper botth about \$1. This would cut a very hig hole in the revenues of the Pullman company, but the general passenger agents look upon it is being a large revenue when taken into consideration the cost of construction of the car and the amount it will carn in its lifetime. A Pullman car well made is regarded as servicentile for at least wenty years with, of course, necessary repairs.

Another thing the general passenger agents seeg to drive out of existence in the Pullman company which is, perhaps, the most offensive custom of the Pullman company one in two processing the drive out of existence in the Pullman company which is, perhaps, the most offensive custom of the Pullman company one in vorces by that corporation. And that is the tipping demanded by porters. The public may not know it, but it remains a fact, nevertheless, that there are runs between New York and Chicago where perfers makes \$200 per month, while the conductor of the Same car, who is responsible for the car, receives the month, while the conductor of the Same car, who is responsible for the car, receives the manificent salary of \$80 per month.

In some instances it has been knewn where porters on runs like the New York and Chicago limited, where travel is knewy and the passengers are usually people of wealth, have paid the Pullman company for the riverage salary paid to a porter is from \$15 to \$25 per month.

It is the policy of the Pullman company to make its tates based on the long the of midding.

HOW RATES ARE FIXED.

HOW RATES ARE FIXED.

As an illustration. There are now three imports sleeping cars being operated between Washington and Chicago. These are by the Pennsylvania. Baltimore and Onio and Chesapeake and Onio. There is not a great deal of difference in time of trains) by either of these lines. Yet the Pulitian company makes its rates based upon the long line mileage.

If it were possible to establish mother through sieeping care line, through to Chicago, say by way of Barrisburg Rechrister, Buffalo. Niagara Fails and Detroit, which would be perhaps two hundred miles longer than by either of the present routes, the Pulman Company would be near a value of the Pulman Company would be near routes that charged over the long line, the latterness to be made on the time in transh. All rates of travel made by the radirond are based on the short line unlessed, and matter whether there is a through car service via that line or not, but by the shortest possible mileage over reads connecting with cach other.

It is understood that Mr. Puliman is very much wrought up at the action taken by the general passenger agents and is load in denomicing them as meddlers and advises them to attend to their own husbass, and he will attend to their own husbass, and he will attend to the Mr. Puliman is apparently growing excited.

Justice Higgmer, sitting in probate court pesterday defined to admit the alleged will of George T. Parks to probate upon the grounds that it camest properly be called a will in the form in which it was received.

At the top of the first page of the manuscript, all of which is written in pencil, the testator, under the words. "my will," directs that bequests shall be made to various persons. The property bemeenthed consisted larrely of paintings jewelry, real estate, and the various odds and each of brica-brac the testator possessed.

At the bottom, written close to the margin, was the following: "Copy to printed will" and "Distribute as above." The memorandum is signed "Geo. T. Parks," above the date July 7, 1894.

On the reverse side of this paper is a note addressed to "Fred'k R. Parks," which reads. "Please distribute my estate as herein directed," signed by the deceased, succeeding the words: "Yours very sincretely."

Frederick R. Parks was appointed administrator of the estate, bond being required in the sum of \$2,000.
